STINGRAY BUSINESS

Leaders in digital solutions for businesses

Tens of thousands of companies across the world trust Stingray Business to enhance the customer experience with music and digital display-based solutions. Our expertise has been leveraged in 74 thousand commercial spaces such as hotels, restaurants, retail stores, banks, spas and more. Stingray Business owes its reputation to a solid technical infrastructure and cutting edge audiovisual equipment.

Stingray Business is a property of Stingray, a leading business-to-business multi-platform music and in-store media solutions provider operating on a global scale, reaching an estimated 400 million Pay-TV subscribers in 152 countries. Geared towards individuals and businesses alike, Stingray's products include the following leading digital music and video services: Stingray Music, Stingray Concerts, Stingray Brava, Stingray Djazz, Stingray Music Videos, Stingray Lite TV, Stingray Ambiance, Stingray Karaoke, Festival 4K, and iConcerts.

Stingray is headquartered in Montreal and currently has close to 300 employees worldwide, including in the United States, the United Kingdom, the Netherlands, Switzerland, France, Israel, Australia and South Korea.

OUR PRODUCTS AND SERVICES

BACKGROUND MUSIC

Improving your image through sound branding

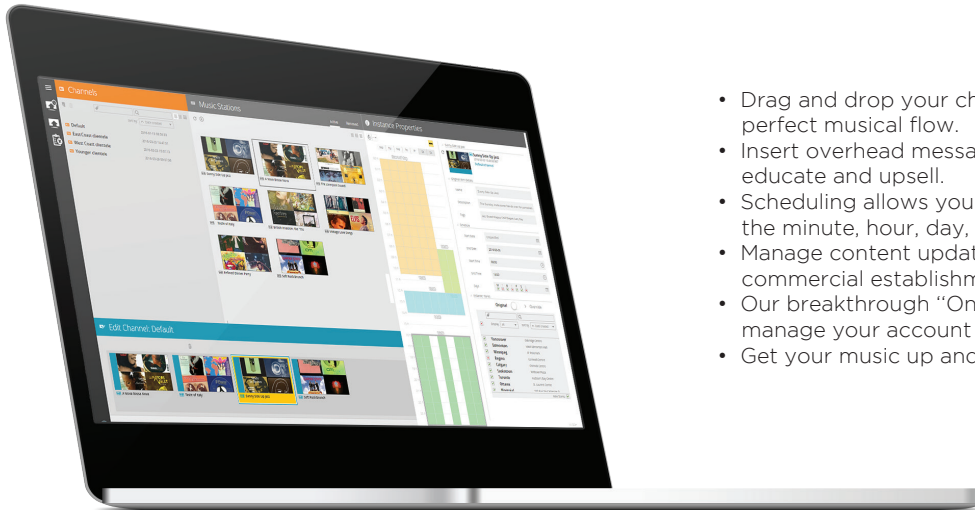

Give your brand a distinctive sound with our affordable and licensed background music channels! Our team of 100 expert music programmers have carefully handpicked each song to create a cohesive and appealing experience in your hotel. Choose from our extensive selection of fully licensed channels in every genre or develop your signature brand atmosphere with a customized playlist.

Every major international brand uses and invests in music as part of its communication strategy. Why not put this tool to use for your hotel? After conducting thorough market research, our sound designers will develop a unique musical identity that is tailored to your brand and that appeals to your target demographic. This advanced solution is ideal for larger chains and franchises looking to expand their reach while creating a consistent experience globally.

BACKGROUND MUSIC

Manage content updates and schedules remotely with our simple online tool

- Drag and drop your channels into your calendar to build the perfect musical flow.
- Insert overhead messages into your lineup to inform, educate and upsell.
- Scheduling allows you to change your genre or tempo by the minute, hour, day, week, or season.
- Manage content updates and schedules for all your commercial establishments with one single login.
- Our breakthrough “On the Go” feature allows you to manage your account from your mobile device.
- Get your music up and running in less than 10 minutes.

MUSIC SYSTEMS

Put the power of the Bose® brand to work

How important is quality sound for your hotel or resort? Consider all the places where sound can affect your guests' experience: the lobby, guest room, restaurant, spa, meeting and function rooms. Sound is an amenity your guests enjoy on nearly every inch of your property.

To bring to market an unparalleled audio offering for the high-end hospitality niche, Stingray Business has joined forces with Bose Professional, one of the most respected and recognized consumer electronics brands, and one your guests already associate with quality, performance and luxury.

BOSE®

Wherever you go on the property, you're hearing quality sound, and that's contributing to the complete experience we want to create here for our guests.

ROOMMATCH® UTILITY SMALL-FORMAT LOUDSPEAKERS

With Bose® RoomMatch® loudspeakers and PowerMatch® amplifiers you have the flexibility to create custom solutions from standard components, regardless of system configurations or room characteristics.

RMU 208 RoomMatch® Utility Small

The highest output model, intended for use in high-quality foreground music, under-balcony and zone fill applications. The multi-angle enclosure also allows use in vocal-range floor monitor applications.

- 2 x 8-inch woofers
- 70 Hz low-frequency range
- 90° x 60° coverage pattern
- 128 dB maximum peak SPL

RMU 206 RoomMatch® Utility Small

A unique angled baffle enclosure design minimizes the projected height for typical under-balcony and low-ceiling zone-fill applications.

- 2 x 6.5-inch woofers
- 80 Hz low-frequency range
- 120° x 60° coverage pattern
- 123 dB maximum peak SPL

RMU 108

The most versatile model with a blend of compact size, excellent sound quality and flexible mounting options. Similar to the RMU208, but with a single woofer sharing the multi-angle enclosure profile and high-frequency waveguide.

- 1 x 8-inch woofer
- 80 Hz low-frequency range
- 90° x 60° coverage pattern
- 123 dB maximum peak SPL
- White/Dark Gray, White/Yellow.

RMU 105

The most compact model, intended for use in high-quality background music and zone-fill applications that require excellent audio, minimal physical size and high design aesthetics. One of the smallest loudspeakers to use a compression driver, rather than dome tweeter, for exceptional output-to-size ratio.

- 1 x 5.25-inch woofer
- 90 Hz low-frequency range
- 100° x 100° coverage pattern
- 118 dB maximum peak SPL

FreeSpace® 360P Series II Loudspeaker

This loudspeaker reproduces music with the presence and depth you would expect only indoors, all while disappearing into nearly any outdoor setting.

Applications

Outdoor dining areas, pool areas, gardens, atriums.

Key Features

360° coverage, withstands sand, snow, rain, salt and temperature extremes of 158°F (70°C) to -40°F (-40°C).

Colors

Green

Panaray® MA12 & MA12EX Modular Line Array Loudspeaker

Slim column loudspeakers blend with almost any décor and provide wide horizontal coverage for applications requiring mid/high (MA12) and full-range (MA12EX) sound.

Applications

Voice and light music reproduction for larger spaces, such as lobbies and concourses. MA12EX can be used indoors and outdoors.

Key Features

Microphone-friendly, with outstanding resistance to feedback. Installer friendly – easy to carry, hang, stack and service.

Colors

Black or White. Paintable.

L1® Portable Line Array Systems

These portable sound systems work as both a PA and monitor system, delivering even coverage, sound clarity and detail for both musicians and audience members.

Key Features

Reduces the need for numerous loudspeakers and electronics. Unobtrusive design and easy setup enables it to be used as a portable system in smaller spaces.

Colors

Black

ENTERTAINMENT SYSTEM SOUND

Discover the full potential of in-room cinema with thrilling sound from Bose. From soundbars to surround sound, you'll find Bose technologies make all the difference for your entertainment.

SoundTouch® 120 home theater system

The SoundTouch® 120 home theater system combines high-performing audio with ease of use. A single 17" soundbar delivers clear, natural sound, while the wireless Acoustimass® module provides impactful bass. It's also a powerful music system that

lets you easily enjoy wireless music when connected to your existing hotel Wi-Fi® network or Bluetooth® devices.

Key Features

Spacious, detailed sound from a compact soundbar. Small control console with 4 HDMI™ inputs ensures the highest-quality sound from your components. Wirelessly plays Internet radio stations and your stored music library. Customizes sound to fit your room for a consistent, high-quality performance.

Colors

Black

Lifestyle® 650 home theater system

The Lifestyle® 600 and 650 systems combine our most advanced surround sound technologies with simplicity, versatility and elegance. Four OmniJewel speakers deliver real surround sound to every seat in the room, while the Acoustimass® wireless bass module provides impactful bass even if you hide it out of sight.

Key Features

Lets you play music directly from a phone or tablet using Bluetooth, or connect the system to your Wi-Fi network for instant in-home listening, without the need for your phone.

Colors

Black

Bose® Solo 5 TV sound system

A one-piece soundbar that brings noticeably better sound to all your favorite TV programs. Engineered to help clearly reproduce everything from dialogue to details.

Key Features

A one-piece soundbar that brings noticeably better sound to all your favorite TV programs and for even more clarity, its dialogue mode makes every word easier to hear. With only one connection to your TV, setup is easy. Bluetooth® connectivity lets you stream music wirelessly. No additional equipment needed.

CineMate® 15 home theater speaker system

This system provides Bose® home theater sound for existing television and video components. Eliminates the need to run surround speaker wires through walls, making it well-suited for existing construction and upgrades.

Key Features

Deep bass from the Acoustimass module that brings movies, TV shows, sports and video games to life. Soundbar fits easily in front of TV and connects with just one cable. Easy-to-use universal remote controls TV, cable box and more. Multiple audio inputs: choice of digital optical, coaxial and analog.

Colors

Black

Bose® SoundTouch 300 Soundbar

The SoundTouch 300 soundbar offers the best performance, spaciousness and bass of any one-piece soundbar its size.

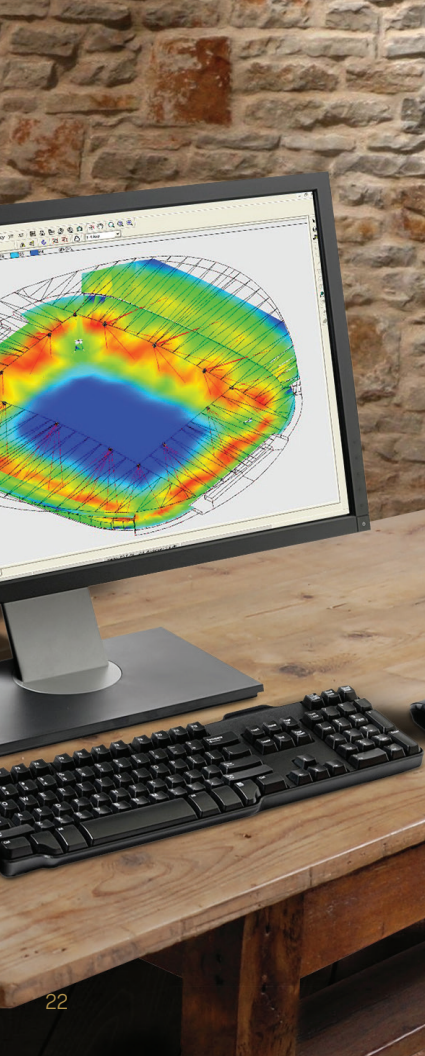

This slim wireless soundbar features a premium glass top and perforated wrap-around metal grille that really draws the eye. Every cubic inch of it is packed with technologies that bring out the best in everything you listen to or watch. To kick it up a notch, add the Acoustimass 300 wireless bass module and combine it with Virtually Invisible 300 wireless surround speakers for full-on surround.

Key Features

Custom drivers, proprietary QuietPort, PhaseGuide technology and the feeling of hearing sounds where there are no speakers. It all adds up to a premium audio experience for all your entertainment.

Colors

Black

SOPHISTICATED ACOUSTICAL ANALYSIS

With Bose® Modeler® sound system software and Auditorer® playback system III.

Every property is different, presenting its own unique audio design challenges. In many cases these challenges can be addressed quickly and efficiently by using the Bose design rules from the Bose design books.

In higher demanding applications the Bose Modeler audio planner can generate a highly detailed acoustic model of your site, and then study the behavior of different sound system configurations within it. The building need not even exist yet, for the model can be generated from the data of your plans. This powerful Windows-based software tool enables any number of loudspeakers to be placed in a virtual space of any shape and size.

Listen to your sound system designs using Auditorer® playback system III.

Modeler designs can be listened to using the Auditorer® playback system III, allowing designers to hear the system performance and use that to help iterate their designs and evaluate the tradeoffs. Clients actually can hear how the proposed system will sound before it is installed. Together, designers and clients can evaluate the right sound systems solutions for the project and the available budget.

BOSE SYSTEM ELECTRONICS

ControlSpace® Engineered Sound Processor

ControlSpace systems deliver a powerful, flexible, sophisticated DSP solution for nearly any installation – large or small, simple or complex. Just as

importantly, a ControlSpace system offers simple, elegant controls that staff and guests can access and operate with confidence. It is well-suited for ballrooms, auditoriums, function rooms and lobbies.

Bose offers a full line of amplifiers and mixers to meet a wide range of needs. From multi-channel, high-output amplifiers for driving foreground and live music reproduction, to combination mixer/amplifiers for background music and paging. Patented Bose technology ensures high-quality, reliable sound performance.

PowerMatch® Configurable Power Amplifier

The Bose PowerMatch line of amplifiers provides concert-quality sound with a high level of scalability and configurability. The PowerMatch line offers four models with multiple channel and power options, each including an integrated audio DSP, front-panel interface and USB connection. Ethernet-equipped versions enable network configuration, control and monitoring. An expansion slot supports input from optional digital audio accessory cards. PowerMatch amplifiers utilize numerous Bose technologies to deliver an unprecedented combination of performance, efficiency and ease of installation all in a reliable, proprietary design.

FreeSpace® IZA 2120 Integrated Zone Amplifier

For background/foreground music and paging applications, Bose® FreeSpace® IZA 2120 integrated zone amplifier elevates the audio experience when using FreeSpace® loudspeakers. Optimized for commercial applications, FreeSpace IZA amplifiers feature selectable Loudspeaker EQ to enrich audio quality, Opti-voice® paging for clear speech intelligibility while providing seamless transitions and Dynamic EQ that ensures full and balanced music at any volume level.

FreeSpace® IZA/ZA Zone Amplifiers

The premium sound, reliability and compact, lightweight design of these amplifiers make them an excellent choice for lobbies, smaller zones and smaller venues. In addition to premium sound and simplified setup/operation, the IZA 250-LZ and IZA 190-HZ integrated zone amplifiers offer the flexibility to expand when more loudspeakers are required.

Additional sound optimization can be provided through EQ presets when used with FreeSpace DS 16 and DS 40 loudspeakers. The ZA 250-LZ and ZA 190-HZ zone amplifiers create easy sound system expansion when used with front-end signal processing from products such as the IZA 250-LZ and IZA 190-HZ amplifiers, the FreeSpace 4400 business music system and ControlSpace engineered sound processors.

“

Bose Corporation's innovative technology made it possible industry status quo. We were able to outfit every suite with

Kevin Thorstenson, Vice President and

for us to extend high-quality sound beyond the hospitality
first-class sound, in a manner that was financially feasible.

”

General Manager, Hotel Park City

DIGITAL SIGNAGE

Bring your brand to life on state of the art monitors

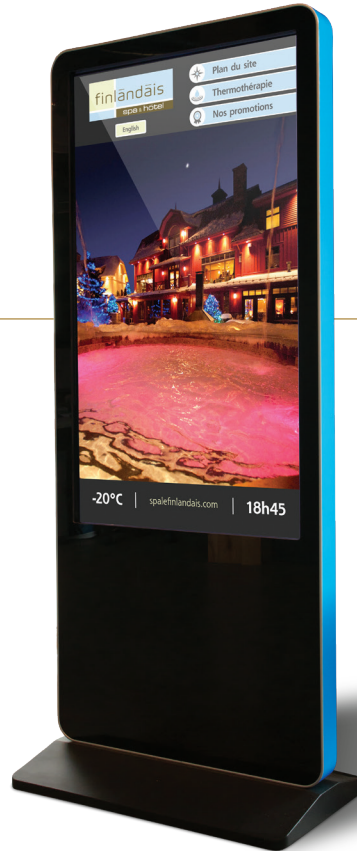

Create engaging and entertaining digital experiences for your guests, while eliminating print costs and reducing perceived wait times at the front desk. Direct visitors to meeting rooms or special events, highlight local attractions, and display property information with bold graphics and stunning imagery.

DIGITAL INTERACTIVE KIOSKS

Used to answer a wide range of marketing objectives, interactive kiosks allow you to connect directly with your customers and to make a lasting impression. This convenient digital solution offers endless possibilities for interactive applications, including:

- Interactive map of hotel premises.
- Room booking system.
- Web browsing.
- Click and display description of the various hotel services.
- Share advertising and promotional messages.
- And much more!

“With the emergence of smart phones and digital tablets, people are more and more open to new technology and tactile screens.”

Digital Signage Today

PROFESSIONALLY BUILT TEMPLATES

A quick and easy approach to hotel digital signage

Welcome Screens

Make far away travelers feel right at home by telling them everything they need to know about your city before they even check in. Weather, news, time, exchange rate and more. Our welcome screens fit perfectly in lobbies and grab attention near the entrance. Free up a portion of your screen for your very own closed circuit hotel channel to broadcast news or other video content of your choice.

Flight Schedule

Arrivals and departures for airports in and around your city are now available on large digital displays for all to see! Let your guests know the status of their flight before they even ask. Includes live flight data, branded visuals and live feeds of your choice.

Event Listing

Modernize your property with our user-friendly event interface solution. Update and broadcast a listing of all your scheduled events in real time to keep your visitors informed. Perfect for weddings, trainings, conferences, receptions, meetings and more.

Video Content Specialists

In-store digital marketing success starts with developing the right content strategy. Our industry-leading digital content experts will help you reflect and empower your brand identity through the use of engaging digital images, videos, streamed media and animated text.
